Final Marketing – Digital Marketing Website

Overview

Final Marketing is a full-stack digital marketing agency website developed to showcase services, attract potential clients, and generate leads. The project focuses on clean UI/UX, responsiveness, and real-world business functionality with backend integration and database storage.

✨ Features

- Professional landing page
- Fully responsive design (mobile + desktop)
- Lead generation/contact form
- Lead data stored in MySQL database
- Services showcase (SEO, Social Media Marketing, Ads, etc.)
- Testimonials section
- ⚡ Optimized performance and clean UI

Tech Stack

- HTML5
- CSS3
- JavaScript

- PHP (Backend Development)

- MySQL (Database Management)

- Hostinger (Hosting & Deployment)

Project Structure

```
Final-Marketing/
│── index.html
│── /css
│── /js
│── /images
│── /assets
│── /php (backend files connected)
│── database.sql (hostinger server)
```

Team & Contribution

This project was developed as a group project by a team of 3 members.

My Contribution:

- Designed and developed the frontend UI

- Implemented responsive layout

- Integrated PHP backend for handling form submissions

- Connected website with MySQL database for storing leads

Team Contribution:

- Backend support and additional functionality

- Content creation and optimization

- Testing and performance improvements

Use of AI

AI tools were used to enhance development efficiency and improve overall project quality.

- Assisted in generating marketing content and website copy

- Helped with UI/UX design ideas and layout improvements

- Supported debugging and structuring of frontend and PHP backend code
